We provide affordable off-the-shelf software products and cost effective web applications that can be fully customized according to your requirements. Our software products have been developed by our highly skilled software engineers and are available in wide range of attractive licensing and support options.

Manage content the easy way

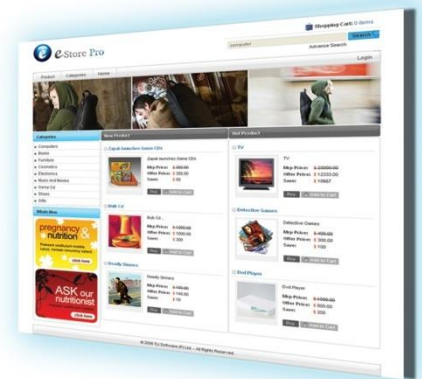

e-CMS is a Web-based configurable content management system that lets you manage your web site content online

TLI Software e-CMS is a Web-based customizable and configurable content management system (CMS) that makes website editing as easy as typing in a word processor.

Our e-CMS allows you to manage your website without having to grasp HTML or other web programming languages.

TLI's CMS software gives you control of your website as it provides an easy to use interface that enables creating, changing, and deleting content through a WYSIWYG interface without the need for a webmaster. You are the webmaster of your own small and medium business website.

Our CMS Software contains management and delivery applications that allow users to create, edit, and update content the fast and easy way.
